

## Assembling Folding Space-Station Interior "L"

## The Escape Pods

When the reactor's overheating, and the controls are locked, and the bad guys have disabled the transporters, and the computers are all giving you blue screens of death, sometimes all you can do is run for the exits. This interior gives eight beings a chance to bail out and survive until rescued (but by whom?).

This is a half-module that will fit next to the long side of any other interior.

Print one copy of each page. Assemble the floor and walls like any of the other sci-fi interiors. The second wall page also has pieces of the outer walls. This interior also includes one door for each escape pod, to close off the pod bays after they've been used. The actual pods aren't included; the interior walls of the pod bays are supposed to represent the interiors of the pods.

The floor plan looks like this:

```
#####
#   +   #
#--|+#
#   +   #
#--|+#
#   +   #
#--|+#
#   +   #
#--|+#
#   +   #
#--|+#
#   +   #
#--|+#
#   +   #
#--|+#
#####
```

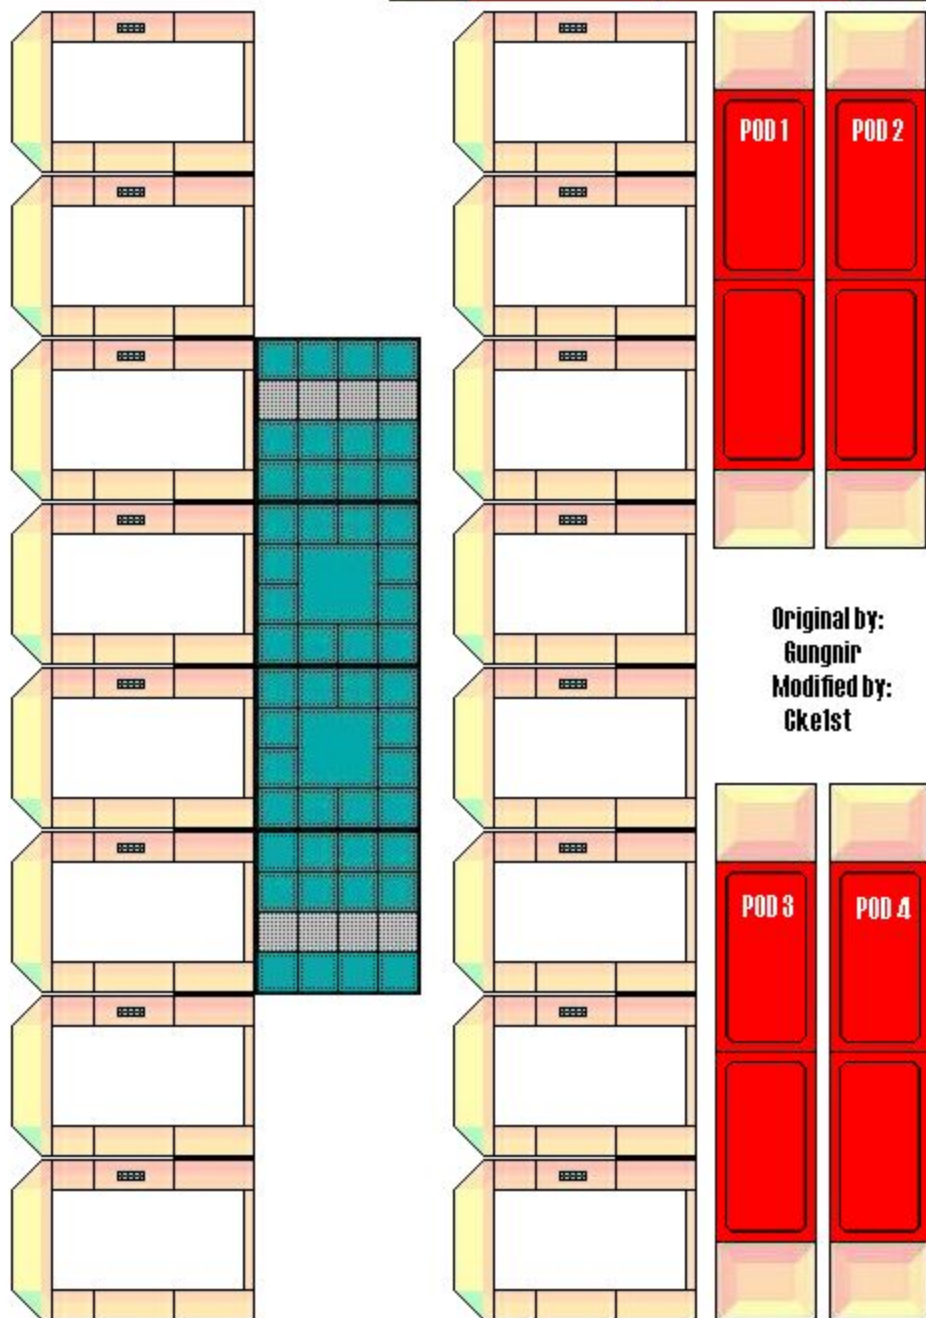

The outer walls for this module won't work with other interiors, since

they're  
shortened to fit these half-sized interiors. Other interiors' outer walls  
won't work with these interiors for the same reason.
